Atwiine Precious Mwebaze

Software Developer · Web, Backend & Mobile Applications

Kampala, Uganda · +256 766 045 396 · preciousinshuti3@gmail.com · preciousatwiine.is-a.dev

Professional Summary

Software developer with professional experience building frontend features for a production B2B SaaS platform with Next.js, TypeScript and React. I also build full-stack web applications with Python (Django and Flask) and relational databases (MySQL, PostgreSQL), and cross-platform mobile apps with Flutter and Firebase. Experienced in REST API integration and Agile teamwork. Currently pursuing a BSc in Computer Science (evening programme) at Makerere University and available for full-time work Monday–Friday, 8:30 am – 4:30 pm.

Technical Skills

Frontend: React, Next.js (App Router), TypeScript, JavaScript, HTML & CSS, Tailwind CSS

Backend: Python, Django, Flask, C#, .NET / ASP.NET MVC, Node.js

Mobile: Flutter, Dart, Firebase Authentication, Cloud Firestore

Databases: MySQL, PostgreSQL, SQL Server

UI & Forms: shadcn/ui, TanStack Table, React Hook Form, Zod, Framer Motion

Tools & Practices: Git & GitHub, Docker, REST API integration, Agile / Scrum

Work Experience

Junior Software Developer | Lumpsum Technologies | *March 2025 – Present*

- Develop frontend modules for a production B2B SaaS platform with Next.js, TypeScript and React.
- Integrate interfaces with REST APIs, agreeing API contracts with backend developers.
- Contribute to software development projects in an Agile/Scrum team with iterative sprint delivery.

Software Trainer | Code Academy Uganda | *November 2022 – February 2023*

- Trained students in programming fundamentals including Python, Scratch, and machine learning basics.
- Guided learners through practical coding exercises, building problem-solving skills and programming logic.

Notable Projects

QuickMed — Flutter, Dart, Firebase Authentication, Cloud Firestore

Team project: a mobile app that schedules medication reminders and estimates travel time to the user's pharmacy. My contribution: the authentication flow (sign-in, registration and password reset with Firebase Authentication) and the dashboard home screen.

HR Management System — Python, Flask, MySQL, SQLAlchemy

Team project: a web application for managing employees, attendance, leave, payroll and recruitment. My contribution: designed and created the 16-table relational database from the ERD (keys, relationships and constraints) and worked on the user interface.

MediGo (in development) — Flutter, Dart, Firebase, Cloud Firestore

Ongoing personal project: a pharmacy and medicine-ordering app. Built so far: onboarding; email, Google and Apple sign-in; a live pharmacy list; adding pharmacies with address geocoding; a medicine catalogue; and a cart. Ordering and delivery are not yet implemented.

MERK Establishments Management System — Django, Python, PostgreSQL

Individual project: product, sales and staff-account management, with password reset by emailed one-time code. Configured for deployment with Gunicorn and WhiteNoise.

KGL Grocery Management System — Django, Python, SQLite
Individual project: stock and sales management for a produce wholesaler, with separate dashboards for owners, managers and sales agents.

Education

Bachelor of Science in Computer Science — Makerere University | *2025 – Present* *(Evening programme)*

Certificate in Python Development — Refactory Academy | *Feb 2025 – July 2025*

Uganda Advanced Certificate of Education (UACE) — Nabisunsa Girls' Secondary School | *2024*

Uganda Certificate of Education (UCE) — Nabisunsa Girls' Secondary School | *2022*

Certifications & Training

- Certificate in Software Engineering with Python – Refactory Academy Uganda
- Certificate in Python — Code Academy Uganda
- Certificate in Machine Learning — Code Academy Uganda
- Certificate in Scratch (Beginner, Intermediate, Advanced) — Code Academy Uganda

Languages

English: Fluent — technical documentation and professional communication
Runyankore: Native
